

POLAR SPRAY

Polar Spray Bondcoat 500 powder is a nickel base, self-bonding powder which bonds to any properly prepared, metal surface (except copper). High Bond Strength - 7000 to 10,000 psi.
1 pound **Part No. 10814**

Polar Spray 502 powder is a **Two Step** gas atomized, Inconel alloy material which can be built up over the initial layer of BondKote 500.
1 pound **Part No. 10816**

Polar Spray 503 powder is a **Two Step** gas atomized, aluminum Bronze alloy material which can be built up over the initial layer of BondKote 500.
2 pound **Part No. 10817**

Polar Spray 504 powder is a **Two Step** flame spray powder specifically developed to provide a hard deposit to combat wear and abrasion.
2 pound **Part No. 10818**

Polar Spray 505 powder is a **Two Step** stainless steel spray powder used to provide a smooth dense coating, with excellent corrosion resistance.
2 pound **Part No. 10819**

Polar Spray 506 powder is a **Two Step** chromium steel spray powder used to provide smooth dense coatings, and hard steel properties.
2 pound **Part No. 10820**

Polar Spray 508 powder is a **Two Step** Iron base alloy flame spray material which can be built up on properly prepared metal surfaces (except copper).
2 pound **Part No. 10822**

Polar Spray 542 powder is a **One Step** flame spray powder especially developed to provide a hard deposit to combat wear and abrasion.
2 pound **Part No. 10825**

Polar Spray 543 powder is a **One Step** composite Nickel base alloy flame spray material which can be built up over properly prepared metal surfaces (except copper).
2 pound **Part No. 10826**

Polar Spray 544 powder is a **One Step** composite Inconel alloy flamespray material which can be built up over properly prepared metal surfaces (except copper).
2 pound **Part No. 10827**

Polar Spray 545 powder is a **One Step** Aluminum Bronze alloy flame spray material which can be built up on properly prepared metal surfaces except pure copper.
2 pound **Part No. 10828**

Polar Spray 547 powder is a **One Step** Nickel base alloy flame spray material which can be built up on properly prepared metal surfaces (except copper).
2 pound **Part No. 10829**

Polar Spray 548 powder is a **One Step** Iron base alloy flame spray material which can be built up on a properly prepared metal surfaces (except copper).
2 pound **Part No. 10830**

Polar Spray 549 powder is a **One Step** Iron base alloy flame spray material which can be built up on a properly prepared metal surfaces (except copper).
2 pound **Part No. 10831**
