

SOLAR SPRAY

Solar Spray 350 powder is a blend of self-fluxing Copper based brazing alloy used to join copper to copper.

1 pound **Part No. 10842**

Solar Spray 910 powder is a self-fluxing Nickel base alloy used to build up stainless steels, carbon steels, cast irons, copper, and copper base alloy parts.

1 pound **Part No. 10834**

Solar Spray 920 powder is a self-fluxing Nickel base alloy used to build up stainless steels, cast irons, copper, and copper base alloy parts.

1 pound **Part No. 10835**

Solar Spray 930 powder is a self-fluxing Nickel base alloy used to build up stainless steels, carbon steels, cast irons, copper, and copper base alloy parts.

1 pound **Part No. 10836**

Solar Spray 940 powder is a self-fluxing Nickel base alloy used to build up stainless steels, carbon steels, cast irons, copper, and copper base alloy parts.

1 pound **Part No. 10837**

Solar Spray 950 powder is a self-fluxing Nickel base alloy used to build up stainless steels, carbon steels, cast irons, copper, and copper base alloy parts.

1 pound **Part No. 10838**

Solar Spray 960 powder is a self-fluxing Nickel base alloy used to build up stainless steels, carbon steels, cast irons, copper, and copper base alloy parts.

1 pound **Part No. 10839**

Solar Spray 980 powder is a blend of self-fluxing Nickel base alloy and very hard Tungsten carbide powders. Solar Spray 980 metallurgically bonds to stainless steels, carbon steels, cast irons and copper alloy parts.

1 pound **Part No. 10840**

Solar Spray 990 powder is a blend of self-fluxing Nickel base alloy and very hard, fine sized, sintered Tungsten carbide powders. Solar Spray 990 metallurgically bonds to stainless steels, carbon steels, cast irons and copper alloy parts.

1 pound **Part No. 10841**
